

Nigerian Urban Reproductive Health Initiative

Stakeholders Analysis Questionnaire Report

CONCEPT NOTE ON THE STAKEHOLDERS ANALYSIS TO BE CONDUCTED IN NURHI 6

SUPPORT STATES WITHIN NIGERIA

NURHI-Nigerian Urban Reproductive Health Initiative is a five year project awarded in September 2009 ,funded by the Bill and Melinda Gates Foundation to reduce barriers to family planning/Child spacing use and increase the contraceptive prevalence rate in selected urban areas of Nigeria.

NURHI intends to harness the potential of Nigeria’s dynamic urban environment to improve services and promote healthful lifestyles and reduce pressure on the urban health infrastructures in the country.

According to NURHI year I project work plan , there is need for a stakeholders analysis so as to identify and assess potential impact and then plan strategies related only to those specific stakeholders that warrant attention.

STAKEHOLDER ANALYSIS

Stakeholder analysis is a process of systematically gathering and analyzing qualitative information to determine whose interests should be taken into account when developing and /or implementing a policy or program.

Who is a Stakeholder?

Stakeholders in a process are actors (persons or organizations) with a vested interest in the policy being promoted. These stakeholders, or “interested parties,” can usually be grouped into the following categories: international/donors, national political (legislators, governors), public (ministry of health [MOH], social security agency, Individuals, labor, unions, medical associations, Medical providers both commercial and private Non -profit (nongovernmental organizations civil society, and users/consumers.

Why Is this Analysis Useful?

NURHI managers can use this stakeholder analysis to identify the key actors and to assess their knowledge, interests, positions, alliances, and importance related to its vision. This allows managers to increase support for this program. When this analysis is conducted NURHI managers can detect and act to prevent potential misunderstandings about and/or opposition to the policy or program.

The Policy for which this analysis is based

A Nigeria where barriers to family planning/Child spacing use are eliminated, particularly among the urban poor.

Identified Key Stakeholders for NURHI project

- Household Heads
- Women of Child bearing age between 15-50
- Community Leaders
- Public Sector
- Private Sector
- Private Health Provider including Pharmacies
- Public Health Provider
- Religious Leaders
- Media Practitioners
- NGO working on Reproductive Health and social services

General List of Stakeholders

The following table illustrates general information on priority stakeholders to be interviewed, with a justification for each group's inclusion in the analysis.

Sector	Sub-Sector	No to be interviewed	Reason chosen/relation to program
Public	Women	20	They are the primary beneficiary of the family Planning program
	Men	20	
	Community Leaders	5	They represent a very strong voice which has strong impact in decision in the community
	Health Centers	10	These are where the women go for deliveries and is a very good avenue to get across to them
	Private Hospitals	10	As described above
	Religious leaders	5	Their religious disposition and preaching towards Family planning program may impact greatly on the attitude of their members both negatively or positively

NGOs		5	Their effort has been very influential in determining the direction of Health programs generally.
Media	Print Electronic	2 3	They are going to be the voice to the program.

METHODOLOGY

The method to be adopted for this analysis will be direct distribution of the questionnaires to the respondents for them to fill. Where/when the respondent is not literate enough to interpret the questions, the interviewer will translate to him/her and help in writing the respondents opinion to each question without being biased.

At least, three (3) interviewers will be chosen from each of the 6 states to carry out the exercise and it is expected to last for 3 days in each state for effective coverage. A monitor is expected to visit at least 3 of the six states to monitor the exercise.

At the end of the exercise, the opinion of the stakeholders will be measured and this will be used as tool for decision making.

Introduction

We are from Health Reform Foundation of Nigeria (HERFON), we are conducting a study on behalf of Nigerian Urban Reproductive Health Initiative (NURHI) to explore the opinions of several important actors who are interested in removing the barriers to family planning/ Child spacing particular among the urban poor. As an important actor, it is crucial for us to obtain your opinion/ that of your organization.

We plan to conduct about 70-80 interviews to produce a general report on the opinions of the major stakeholders. The information obtained through these interviews will be for the direct use of the analysis team, and will be presented in a general report to NURHI without identifying individual opinions.

We would want you to help us respond to the following questions without bias.

Your Opinion

S/N	GENERAL QUESTIONS	
1.	How Many children have you	
2.	Do you intend to have more	
3.	Have you heard of family planning	
4.	What do you understand by family planning	
5.	What methods do you know	

6.	What is your cultural perspective about family planning	
7.	What is your religious perspective about family planning	
8.	Are there economic implication of family planning	
9.	<p>Out of the following methods, which one do you prefer/</p> <ul style="list-style-type: none"> • Combined Oral Contraceptives • Female sterilization • Vasectomy • Injectable contraceptives • LAM(Lactational Amenorrhea Method) • Diaphragm with spermicide • Condoms • Contraceptive implants • Fertility awareness Method • Copper -Bearing IUD (intrauterine device) • Progestin-only Oral contraceptives • Withdrawal method 	
14.	How would you encourage your relation about family planning	
15.	What is your general comment on family planning	
State Ministry of Health		
16	What are the various step taken so far by the ministry to improve family planning	
17	Are there laws passed or yet to be passed that is for or against family planning	
18	What are the general things the government has done on family planning
